# Using TurboStats Ultra with StatBroadcast Broadcastr

You will need an active license to TurboStats Ultra or higher in order to proceed (the lower versions do not offer Webcasting) and you will need TurboStats installed on your computer and a game already created in it, ready to score.

You will also need to have the StatBroadcast Broadcastr downloaded and installed on your computer (that can be found at http://software.statbroadcast.com)

The Local XML Webcast window will launch. IMPORTANT: DO NOT CLOSE THIS WINDOW.

Please leave it open in the background or minimize it for the duration of the game.

The blue text shows to the path to your XML file. You will need this for Broadcastr in the next steps.

You'll now need to tell Broadcastr where to find the XML file.

Use the XML file path from the Webcast screen in TurboStats (the dark blue text)

1-855-838-2841

https://support.statbroadcast.com

support@statbroadcast.com

Select the folder (by default, that is the C: drive and FOOTBALL) and double-click it to open. Then select the turbostats.xml file.

### Press Open once the file is selected.
